Standard suction-cup holders with fixing screw

A very strong nickel plated brass tubular element, with a rapid joint for attachment to a suction tube, together with a threaded sleeve with two nuts for attachment to the unit, and one or two springs to dampen the contact and exert a continuous pressure on the object to which the suction cup is attached.

- Rapid straight and “L” shaped joint
- Plastic tube diameter 6 x 8
- ”L” shaped rapid joint = art. PS.....L
