Standard suction-cup holders with valve and fi xing screw

This type of suction-cup holder has the same characteristics as the standard type, with the addition of a valve which is activated only when a pressure is exerted on the suction cup, and closes automatically when the pressure is released.

N.B. - This type of suction-cup holders is particularly recommended for avoiding vacuum leaks, or when using a more powerful pump.

- Rapid straight and “L” shaped joint
- Plastic tube diameter 6 x 8
- Rapid “L” shaped joints = art PSV.....L
